Fence Permit

Q&A

- **When is it necessary for me to obtain a fence permit?** *As of January 1, 2008, anyone planning to repair, replace or install a fence will be required to obtain a permit from the Planning and Inspections Department prior to commencement of any work.*
- **Where can I get an application?** *You can pick up an application at Morehead City Hall located at 706 Arendell Street, Morehead City, or call the Planning and Inspections Department at (252) 726-6848 x125.*
- **What is the cost of the permit?** *There is currently no cost to obtain a fence permit.*
- **Does my existing fence have to come into compliance with the new regulations?** *An existing fence may remain the way it is unless repairs or other alterations are made. Any changes to an existing fence will require a permit and the fence to come into compliance with current regulations.*
- **How tall can a fence be constructed?** *For residential districts, solid fences or walls installed in a front yard (area from the front property line to the front setback line) may be constructed no taller than three feet (3'); six feet (6') in the remaining yard. No fence may restrict visibility at any intersection. If the fence is not solid (more than fifty percent (50%) opening as viewed from outside the fence) then the front yard height can go up to four feet (4').*
- **What if my existing fence encroaches into a right-of-way or City property?** *The City reserves the right to remove fences from rights-of-way and/or publicly owned property. In the event a fence is removed by the City, the replacement of a new fence or repair to an existing fence must be in compliance with current regulations.*
